

Voyage Recorder YDVR-03

Save the exciting moments
of your voyages

- Collect GPS points, wind, depth, weather, AIS tracks and all other data on your vessel's network.
- Get a real, multi-page, editable and printable logbook of any voyage with a few mouse clicks.
- PC software can convert Voyage Recorder data to GPX (tracks), spreadsheet, OpenSkipper, CanBoat, Signal K and other formats.
- Automatic deletion of old data: plug device into the network and forget about it.

- Designed for operation on NMEA 2000 networks.
- True plug-and-play device: 2-minute installation and it is ready to go.
- Fully compatible with a wide range of equipment: Raymarine SeaTalk NG, Simrad SimNet, Furuno CAN, Garmin.
- Supplied with different types of connectors for networks and equipment of different manufacturers.

Operating voltage (from an NMEA 2000 network)	10.5..16 V
Protection against reverse polarity	Yes
Average current consumption	23 mA
Load Equivalency Number	1 LEN
Operating temperature range	-25..+85 °C
Weight without MicroSD card	15 g
Recommended MicroSD card class	Class 10
Recommended MicroSD card size	16—32 GB
Estimated recording capacity for 16 GB	100—200 days
Automatic overwrite of old data	Yes
Recording of data from bus, not less than	99.5 %
